

## Intended Audience

The Pediatric Fundamental Critical Care Support (PFCCS) is designed to prepare health care providers caring for unstable, critically ill, or injured pediatric patients. Likely participants include:

- Hospitalists caring for potentially unstable, critically ill or injured pediatric patients
- Advanced Practice Nurses and Physician Assistants with limited pediatric practice
- Rapid Response/Medical Emergency Team members
- Pediatric Critical care fellows beginning their training
- Emergency medicine physicians who do not routinely care for pediatric patients
- Nursing caring for complex and potentially unstable Pediatric patients
- Pre-hospital providers and Transport Teams who are involved with the transport of pediatric patients

## Course Objectives

- Prioritize assessment needs for the critically ill or injured infant and child.
- Select appropriate diagnostic tests.
- Identify and respond to significant changes in the unstable pediatric patient.
- Recognize and initiate management of acute life-threatening conditions.
- Determine the need for expert consultation and/or patient transfer and prepare the practitioner for optimally accomplishing transfer.
